PROFILE

MSc Computer Science candidate at the University of Fort Hare, seeking a software development role starting in 2027. I have built open-source projects in Python, Java, and C#, including an offline-first attendance register for schools with poor signal. During a year-long graduate programme at Sambe Consulting, I built a Power Platform app that cut HR timesheet processing from three days to under an hour and set up CI/CD pipelines into SQL Server. Microsoft certified in Azure development (AZ-204) and Azure AI engineering (AI-102).

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, HTML, CSS, JavaScript
Frameworks: FastAPI, Flask, Spring Boot, ASP.NET Core, Entity Framework Core, Spring Data JPA
Databases: PostgreSQL, SQL Server, SQLite, IndexedDB
Testing and DevOps: Microsoft Azure, GitHub Actions (CI/CD), Git, pytest, JUnit, xUnit, Render
Data and Low-code: SSIS (ETL), Power BI, Power Apps, Power Automate, SharePoint
Machine learning: Random Forest, scikit-learn

PROJECTS

IsiXhosa Tech Glossary

- Built a REST API and website for computing terms in English and isiXhosa, with ranked search in both languages and a reviewd community-suggestion workflow.
- Deployed on Render with a Neon PostgreSQL database; 36 automated tests run against SQLite and PostgreSQL on every push, and the app deploys only after they pass

Stokvel Manager

- Built a REST API for rotating savings groups that tracks contributions, payout order, arrears, and member statements, and blocks a payout until every member has paid.
- Used Flyway migrations, HTTP Basic security, and OpenAPI docs; unit and integration tests (JUnit, MockMvc) run against H2 and PostgreSQL in CI.

Offline School Register

- Built an attendance register that works without signal: a service worker and IndexedDB keep the app and its data on the phone, and changes sync when signal returns.
- Designed an idempotent sync API with last-writer-wins conflict handling and incremental updates, tested with xUnit integration tests and Node unit tests

EXPERIENCE

Computer Science Tutor, *University of Fort Hare* 03/2026 – Present

- Run Java (Object-Oriented Programming) and Python (omputer networks)

Business Analysis Mentor, *PAICTA* 04/2026 – 09/2026 | Alice

- Mentored 30 learners in requirements gathering, stakeholder engagement and process modelling (BPMN).

- Reviewed learners' BRDs, functional specifications, use cases and process maps for quality and completeness.
- Ran workshops and simulation exercises based on real consulting projects, and gave learners

Business Intelligence and Data Analytics Graduate 02/2025 – 01/2026 | Johannesburg
Sambe Consulting
- Built a Power Apps and Power Automate app for HR timesheets with role-based access and automated approvals, cutting processing time from three days to under an hour.
- Set up CI/CD pipelines in GitHub Actions to provision databases across environments, with approval gates before production.
- Built SSIS ETL pipelines that combined data from several sou

ICC Tutor, *University o* 07/2024 – 12/2024
- Introduced students to essential Microsoft Office packages and computer hardware fundamentals.
- Helped students build practical digital skills required for academic and professional success in agriculture-related fields.

CLT Tutor, *University of Fort Hare* 07/2023 – 12/2023
- Taught and introduced students to Microsoft Office applications (Word, Excel, PowerPoint).
- Helped students build practical digital skills required for academic and professional success in commerce-related fields.

EDUCATION

Master of Science in Computer Science, *University of Fort Hare* 2025 – Present
Dissertation: Random Forest-Based Personalised Climate-Smart Learning for Enhancing Resilience in Rural Eastern Cape High Schools

Bachelor of Science Honors in Computer Science, *University of Fort Hare* 2024
Research: An Algorithm to Maintain Confidentiality of Voice Activation Data in Smart Homes for People Living with Disabilities

Bachelor of Science, *University of Fort Hare* 2023

National Senior Certificate, *Tolweni SSS* 2020

CERTIFICATES

Microsoft Certified: Azure Al Engineer Associate (AI-102)
November 2025

Microsoft Certified: Azure Developer Associate (AZ-204)
October 2025

Oracle Certified: Al Foundations Associate
October 2025
